PROFESSIONAL PROFILE

Software Engineer with extensive experience designing and building scalable, production-ready applications using Java Spring Boot and Python. Specialized in microservices architecture, event-driven systems, and modular monolith design. Expert in translating complex business requirements into well-structured systems using domain events, loose coupling, and layered architecture patterns.

PROFESSIONAL EXPERIENCE

Backend Engineer <i>OptimaTech Solutions</i>	2025 – 2026 remote
- Developed a Transport Management System managing truck operations, driver registration, and automated trip calculation using Spring Boot and REST APIs. - Built a full-stack Classified Ad System using Spring Boot and MongoDB, integrating a React/Vite frontend. - Optimized database performance for high-traffic applications using PostgreSQL and MongoDB, focusing on efficient persistence and URL mapping. - Integrated third-party services including Paystack API for wallet transactions and JavaMailSender/SMTP for automated notifications.	
Backend Developer <i>AgroNet Solutions</i>	2024 – 2025 Remote
- Architected and implemented FarmSphere, a production-grade modular monolith using Java Spring Boot 3.x with a Maven multi-module architecture designed for microservices migration. - Implemented an event-driven system using Spring ApplicationEventPublisher with domain events across 8 independent modules, ensuring zero inter-module coupling. - Designed and deployed JWT-based authentication and Role-Based Access Control (RBAC) for multi-role users with custom security filters. - Built an API Gateway pattern featuring JWT validation, user context forwarding, and route-based service discovery. - Dockerized the entire ecosystem using multi-stage builds and Docker Compose with PostgreSQL. - Led the development of a government Vehicle Registration & Ticketing System, automating vehicle settlement and reporting features using Java and Python.	

EDUCATION

Software Engineering Professional Program
Semicolon Africa

CORE COMPETENCIES

Languages

- Java (17/21+)
- SQL
- JavaScript
- Golang
- Python
- C++

Frameworks

- Spring Boot 3.x
- Express node
- Django
- React-vite
- FastApi

Architecture

- Microservices
- Layerd Architecture
- RESTful API Design
- Event-Driven Architecture
- Modular Monoliths

DevOps & Cloud

- Docker
- Docker Compose
- CI/CD
- Maven Multi-Module
- Deployment

Security & Tools

- JWT Authentication
- OAuth2
- Kafka/RabbitMQ (ApplicationEventPublisher)
- Paystack API
- Git

FEATURED PROJECTS

FarmSphere

Agri-tech platform

- End-to-end agri-tech platform with farm cycle tracking, intercropping support, and a tokenized investment engine with proportional ROI distribution.

URL Shortener

Performance service

- High-performance service supporting redirection and persistence using Spring Boot and MongoDB.

SOFT SKILLS

Interpersonal & Professional

- System Design Thinking
- Problem-Solving
- Attention to Detail
- Continuous Learning
- Adaptability
- Team Collaboration
